COURT REPORTER:

MS. JAN MASON  
OFFICIAL REPORTER  
101 E. PECAN #110  
SHERMAN, TEXAS 75090

PROCEEDINGS REPORTED BY MECHANICAL STENOGRAPHY, TRANSCRIPT  
PRODUCED BY COMPUTER-AIDED TRANSCRIPTION.

1 the topics for the 30(b)(6), it just makes sense to go ahead  
2 and proceed and do one deposition.

3 Mr. Siebman, what's the other issue?

4 MR. SIEBMAN: The other issue, Your Honor, has to do  
5 with the issue of source code. Previously Micro Focus told us,  
6 and in fact, they included this in filings with the Court,  
7 representations that they had provided the source code on the  
8 products in question as early as last December. But they've  
9 now indicated that they haven't given us all the source code  
10 for all the accused products.

11 And in fact, when you compare the source code that they  
12 have provided to their interrogatory answers, they've  
13 identified 29 products in their interrogatories. Twenty-two  
14 of those we have no source code on. So they've identified  
15 22 products, and with respect -- they've identified 29  
16 products, and with respect to 22 of those products that  
17 they've identified in their interrogatories, we have yet to  
18 receive the code.

19 So all we're asking is that we be given all the  
20 relevant source code for all the products now so that we can  
21 complete the review process without further delay.

22 And we're looking for -- we're not looking for a  
23 sampling of source code. What we're looking for is all the  
24 relevant source code.

25 Also with respect to the bank Defendants, the

MR. SEARS: Thank you.

I certify that the foregoing is a correct transcript from  
the record of proceedings in the above-entitled matter.
